Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-2, 8-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Hansen.

Hansen discloses a towing hitch extension comprising in combination: a tow bar 32 having front and rear ends; a front coupling means at said front end for releasable coupling engagement with a towing hitch; a transversely extending, horizontally oriented, elongated cross bar 30,40,50 extending across and medially adjoining said rear end; and a rearwardly opening towing hitch socket 38 mounted at said rear end and vertically offset relative to said tow bar and said cross bar, said rear towing hitch has a rearwardly opening, cross-sectionally rectangular socket; each of said tow bar, said cross bar, and said towing hitch socket is tubular and has a cross-sectionally rectangular configuration; said front end is telescopically and matingly engageable with said towing hitch socket and is retained in association therewith by coupling pin means inserted transversely through such so engaged members; and said towing hitch socket is telescopically and matingly engageable with a base portion of a ball mount assembly and is

retained in association therewith by coupling pin means inserted transversely through such so engaged members; including a pair of guard projections 54 that each stand up from said cross bar in laterally spaced but adjacent relationship relative to a different respective opposite side of said tow bar wherein each of said guard projections is connected against an upper surface portion of said cross bar by weldments.

Allowable Subject Matter

3. Claims 12-20 are allowed.
4. Claims 3-7, 10-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references disclose trailer hitch extension assemblies.
